- Supervised and ensured the safety of campers aged 4-14; led recreational activities. — Summer 2021 - Summer 2024

Dalton Farm Snow Shoveling - *Business Owner* — Poughquag, NY
- Founded and managed operations, kept track of clients, and cleared driveways. — Winter 2023

PROJECTS

- **Personal Website (Ongoing):** Designing and deploying a portfolio site to showcase in class projects as well as who I am and little things about my life.
- **Wireshark Feature Patch (Ongoing):** Collaborating in a three-person team to modify the large-scale C/C++ Wireshark (v3.2.3) codebase, leveraging advanced AI code-generation tools to efficiently produce 400–600 lines of functional patch source code. Co-developing a custom user interface tab featuring automated packet explanations and quick-copy utilities, accelerating data analysis on a Linux VM.
- **University Management System:** Developed a Java console application utilizing core OOP principles like inheritance and polymorphism to model university personnel. Designed a centralized management module to handle student and faculty records while dynamically calculating GPAs and salaries. Implemented robust exception handling and automated logging to ensure system stability and track runtime events.
- **File Directory Analyzer and Report Generator:** Built a Java application that uses recursive algorithms to scan user-specified directories and capture file metadata. Leveraged the Java Collections Framework to parse data and calculate file distribution statistics by extension and size. Engineered an export module to save the generated reports into TXT, CSV, and JSON formats while generating persistent operational logs.

SKILLS & INTERESTS

- **Technical Skills:** Java, Python, C++, ARM Assembly, Arm Architecture, HTML/CSS, GitHub, VS Code, OSI Model, Cisco Packet Tracer, MQTT, Wireshark
- **Languages:** Spanish (Classroom study)
- **Interests:** Gym, tennis, pickleball, networks/cybersecurity, skiing, hiking, reading, piano, and ping-pong
